

HEARTH CLASSICS

Handcrafted Classics for Home & Hearth
Built For Timeless Protection and Style

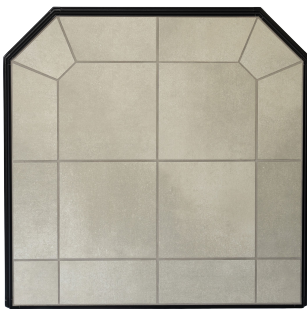

Choose From Our Tile Options

Thoughtfully Crafted For Functional Style

Hearth Classics offers a variety of colors to complement your stove and home's aesthetic. Choose from our tile collection or explore our more intricate color combinations. All our designs are crafted to provide the highest level of protection while adding a unique touch to elevate your home's style.

Current offerings are subject to change, and the actual tile color may vary from the product picture. Tiles shown in any lifestyle pictures may not be available, or may vary from the actual tile color. Please check hearthclassics.com for a current list of available products.

Choose From Our Natural Stone Collection

Curate Your Space With Timeless Stone

At Hearth Classics, in addition to our Hearth Pad tile options, we offer a variety of extended selections of beautiful natural stone that will match your interior's aesthetic. Choose from our Natural Cleft Slate and Tumbled Slate options and create a space that feels like your home.

Natural Cleft Slate

is moderately rough, giving your Hearth Pad a unique appearance.

Tumbled Slate

is a versatile material that adds an earthy and more rustic look to your home's interior. Featured in the interior of the Montana Stone.

The color of slate and stone will vary from the product pictures, as these are natural stones. All our slate Hearth Pads will have a 1-1/4" frame, except for the Montana Stone. Please check hearthclassics.com for a current list of available products.

Mica

Three prominent colors include: silver, gold, and brown.

Used Brick

Composed of brick with a similar style to Tumbled Slate.

Black Slate

Natural Cleft

Indian Slate

Natural Cleft

Montana Stone

The exterior is Indian Slate (Natural Cleft Slate), with a Tumbled Slate interior composed of 2" x 4" bricks.

Random Square Cut in Indian Slate

Our Random Square cut styling adds a dynamic design that complements the hearth pad's stone finish. Available in Indian Slate and Black Slate only.

Venetian Inlay in Indian Slate

The Venetian Inlay detail enhances your slate hearth pad for a more sophisticated look. Available in Indian Slate and Black Slate only.

Choose Protection That Fits Your Stove

Craftsmanship That Safeguards Your Home

All wood, pellet, and coal free-standing stoves require a Hearth Pad to protect your home's flooring. Your stove's needs determine your choice in protection and are a key influencer in your design options. The Ember Defender (Type 1) is an ember protection-only option, designed to protect floors from falling embers. For stoves that require additional insulation from heat to prevent damaging flooring, the Traditional Hearth Pads (Type 2) provide added thermal protection. While Type 1 protection offers limited design options, Type 2 provides a wide selection to protect and match your home.

Ember Defender (Type 1) Specifications

- Offers a black powder coating with a slight texture applied to both sides
- Features a reversible design, allowing for convenient use of either side
- Simplistic design includes fewer shapes and sizes than Traditional Hearth Pads
- Available in black only
- The front edge corners are rounded rather than a straight 45° angle
- Available in sizes up to a maximum of 54" x 54"

Corner and standard are pictured

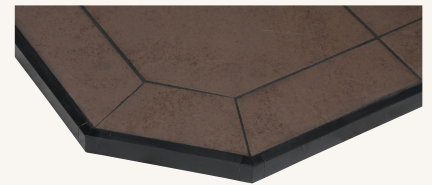

Traditional Hearth Pads (Type 2) Specifications

All of our Type 2 pads offer ember and thermal protection for your home. Every Hearth Pad is made using only non-combustible substrate(s), tested and certified to meet or exceed UL Standard 1618. Choose the look you love and receive the protection you deserve.

Choose Your Traditional Hearth Pad Frame

1" Frame

- Available in Original Edge Frame only
- Maximum size up to 54 x 48
- 30% lighter than other Hearth Pads
- Uses a single 1/2" substrate, providing an R-value of 2.3

Original Edge Frame

1-1/4" Frame

- Available in Original Edge and Classic Edge Frames
- Available in all Hearth Pad sizes, large and small
- Most use two substrates for strength in larger boards and to achieve a 3/4" substrate for the frame, providing an R-value of 1.592
- Natural Stone Hearth Pads that are 54x48 and smaller use a single 5/8" substrate, providing an R-Value of 2.90

Classic Edge Frame

Choose Your Hearth Pad Accessories

Handcrafted Details For Sophisticated Security

To complete our hearth collection, we offer wall pads and pedestals that transform your display into a personalized and inviting space. Our accessories finish your stove's look while providing additional protection.

Extend Your Stove's Design With Wall Pads

Our fully non-combustible wall pads are available for both flat wall and corner installations, and can be paired with either the Original or Classic Edge Hearth Pads. We make matching wall pads to go with every size floor pad, including custom sizes. Our mounting system and fully non-combustible design can reduce clearances to a combustible wall by up to 66% in many cases.

- Available for standard (single-wall board) and corner (two-wall board) installations
- May reduce clearances to combustible walls
- Mounting brackets are available to space wall pad(s) 1" off the Hearth Pad and 1" away from the wall
- Fully customizable to fit unique home features, including windows and corner walls

Talk with your stove dealer and check your stove manual for clearance requirements for your specific stove.

Customize Your Hearth Pad With A Pedestal

Matching pedestals are available for all sizes and shapes, including special orders. Pedestals come in tile, slate, stone, or brick. The Traditional Pedestal and Thermashield are designed to be slightly smaller than the Hearth Pad. The Hearth Pad, which is a separate unit, will overhang both pedestals on all sides.

Both the 6" and 1" pedestal options are built to increase overall R-value.

Traditional Pedestal – 6" Height

- Available with or without thermal value:
 - No Thermal Value Pedestal: Will include a 3/4" solid top surface (not just framing)
 - Thermal Value Pedestal: R-value of 2.08 includes 1" mineral fiberboard
 - R-value of 3.12 includes 1-1/2" mineral fiberboard
- These two options when combined with the Hearth Pad will increase the total R-value to a minimum of 3.67 and 4.71 respectively
- Solid 3/4" surface is installed under the mineral fiberboard and is not included in the R-value rating

Thermashield

- 1" frame – black powder coat (same as Hearth Pad frame)
- 1" of Micore 300, providing an R-value of 2.08 in addition to the R-value of the Hearth Pad
- Can be used with any of our frame offerings

The images are depicted in a hovering view to highlight internal layers.

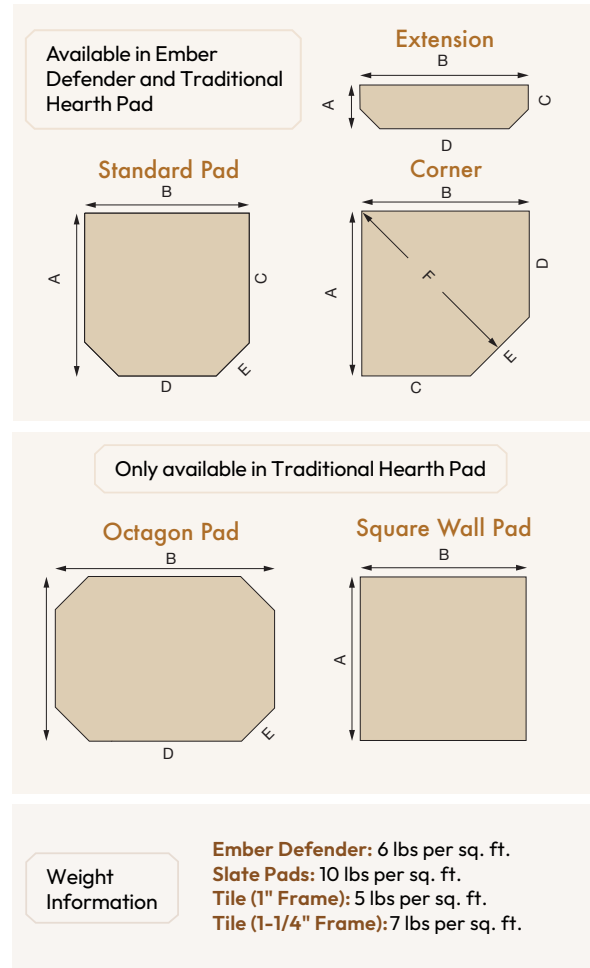

Choose Your Shape and Size

Constructed To Fit Any Space

We offer pads in the most popular sizes and shapes. Please consult your stove's owner's manual to determine the clearance requirements of your stove. Your Hearth Pad dealer can help you choose the most appropriate pad size and shape for your stove. Custom sizes are welcomed but cannot exceed 60 inches in depth or width.
