
Fireplace Doors

CRAFTSMANSHIP THAT
INSPIRES

FORGING PARTNERSHIPS SINCE 1969.

Stoll Fireplace, Inc. was established in 1969 when Mr. William Stoll designed and hand-crafted a custom screen for his South Carolina home. Mr. Stoll's Christian values continue to be the guiding principles of the company's ethical standards and customer satisfaction.

Stoll Industries was formed after a lasting and successful tenure in the fireplace industry. Using their expertise in metal works, Stoll Fireplace, Inc. decided to broaden their custom metal designs to feature cabinets, walls, doors, drawers and backsplashes.

Today, the 3rd generation of the family continues to build on Stoll's reputation in the industry for innovation, customer support, and quality hand-crafted products for the home.

Our Mission:

To be **intentional** in our actions, building an environment of **honesty** and **faith** that creates a platform for **God** in the workplace.

PROUDLY MADE
IN THE USA.

Our wide range of products can be found in the finest specialty stores and design centers throughout the US and Canada.

Fire shown inside closed doors is for display purposes only. Do NOT burn with doors closed unless your doors have pyro-ceramic glass.

Fireplace Education:

The fireplace is one of the most enduring and desirable elements of the American home.

Enhance the beauty and usefulness of any fireplace design while increasing safety and efficiency with the installation of a quality Stoll Industries fireplace door.

We desire to educate and inform you about our products. Use our helpful tutorial to determine which type of fireplace is in your home, and which products are compatible with your existing fireplace.

Types of Fireplaces

Whether you have a traditional brick fireplace, a clean modern marble surround, or an exposed metal firebox, we have a fireplace door that will perfectly fit your application.

Fireplace Sizes

Stoll offers both standard sizes and fully custom fireplace doors. Standard doors are a great fit for homeowners on a budget or looking for quicker production times, while our custom offerings allow for complex customizations and exact fitment when required.

Fireplace Door Types:

Masonry

Masonry fireplaces take many forms, from brick and stone to marble and modern glass designs. These types of fireplaces require an external chimney for smoke to escape, but often allow outside air to enter the home.

Our fireplace doors eliminate 90% of the cold air drafts that may occur, adding functionality to their elegant appearance.

Identification Tip: Look for a brick or stone fireplace that is combined with a working chimney.

Zero Clearance

A zero clearance or factory-built fireplace is a metal box with refractory bricks inside manufactured to be framed into a house. Stoll doors are specially made to fit your brand of manufactured fireplace, with proper “air flow” provided in various ways to ensure all ventilation requirements of the manufacturer are met.

Identification Tip: Look for a manufactured metal fireplace box.

Direct Vent

While a traditional fireplace provides an open burning chamber that vents through a chimney, a direct vent fireplace does not require a chimney and can vent horizontally out a sidewall or vertically to the roof. The front glass enclosure is porous, allowing radiant heat to pass into the room.

As a result, the glass face can become extremely hot. As a safety feature, Stoll incorporates a mesh panel that covers the glass to prevent burning, but still allows the heat to pass through.

Identification Tip: Look for a manufactured metal fireplace box that contains a sealed glass panel that does not open.

Zero Clearance fireplace

Reface

The Stoll reface option is custom designed to fit pre-manufactured fireplaces, but incorporates decorative louvers to cover the ventilation openings.

Our magnetic mounting system allows for quick and easy installation.

Traditional

The traditional series from Stoll is our time-proven line of custom made fireplace doors. Choose from a variety of custom and standard options, durable powder coat finishes, solid metal overlays, or any combination to accent and beautify your fireplace setting.
